is competent under the terms of DIN EN ISO/IEC 17025:2018 to carry out tests in the following fields:

Mechanical and metallographic testing; selected corrosion tests and chemical testing using stationary and mobile vacuum-emissions spectrometers as well as manual non-destructive tests (ultrasonic testing, magnet particle testing, penetrant testing, visual testing and digital radiography) on metallic materials

The accreditation certificate shall only apply in connection with the notice of accreditation of 14.07.2020 with the accreditation number D-PL-11166-01. It comprises the cover sheet, the reverse side of the cover sheet and the following annex with a total of 13 pages.

Registration number of the certificate: **D-PL-11166-01-00**

The publication of extracts of the accreditation certificate is subject to the prior written approval by Deutsche Akkreditierungsstelle GmbH (DAkKS). Exempted is the unchanged form of separate disseminations of the cover sheet by the conformity assessment body mentioned overleaf.

No impression shall be made that the accreditation also extends to fields beyond the scope of accreditation attested by DAkKS.

The accreditation was granted pursuant to the Act on the Accreditation Body (AkkStelleG) of 31 July 2009 (Federal Law Gazette I p. 2625) and the Regulation (EC) No 765/2008 of the European Parliament and of the Council of 9 July 2008 setting out the requirements for accreditation and market surveillance relating to the marketing of products (Official Journal of the European Union L 218 of 9 July 2008, p. 30). DAkKS is a signatory to the Multilateral Agreements for Mutual Recognition of the European co-operation for Accreditation (EA), International Accreditation Forum (IAF) and International Laboratory Accreditation Cooperation (ILAC). The signatories to these agreements recognise each other's accreditations.

Tests in the fields:

mechanical and metallographic testing; selected corrosion tests and chemical testing using stationary and mobile vacuum-emissions spectrometers as well as manual non-destructive tests (ultrasonic testing, magnet particle testing, penetrant testing, visual testing and digital radiography) on metallic materials

Within the scope of accreditation marked with *, the testing laboratory is permitted, without being required to inform and obtain prior approval from DAkkS, to use test standards or equivalent normative test procedures listed here with different issue dates.

The calibration laboratory maintains a current list of all test standards / equivalent normative test procedures within the flexible scope of accreditation.

The test methods are indicated with the following symbols for the locations in which they are conducted:

MH = Mülheim, ES = Esslingen-Mettingen, HH = Hamburg
