

# APPROVAL OF SERVICE SUPPLIERS

This is to certify that

**Element Materials Technology Hamburg GmbH**

**Hamburg, Germany**

is granted acceptance for

**Laboratories performing corrosion testing of corrosion resistant steels , in accordance with Class Programme DNV-CP-0631.**

This service supplier certificate will be accepted for use with all rule sets published by DNV.  
**See the following page(s) for details regarding application.**

This Certificate is valid from **2024-04-15** to (inclusive) **2027-04-14**.

This Certificate is issued on **2024-04-15**.

for **DNV**

This document has been digitally signed and will  
therefore not have handwritten signatures

**Kühne, Dennis**  
**Surveyor**

This Certificate may be withdrawn if:

1. The service provided has been improperly carried out or the results improperly reported.
2. The surveyor has found any deficiencies in the accepted operating systems of the service supplier.
3. The firm has failed to inform of any major changes having effect on the quality of the service rendered.
4. The conditions listed in the certificate are changed and/or are not fulfilled.

LEGAL DISCLAIMER: Unless otherwise stated in the applicable contract with the holder of this document, or following from mandatory law, the liability of DNV AS, its parent companies and their subsidiaries as well as their officers, directors and employees ("DNV") arising from or in connection with the services rendered for the purpose of the issuance of this document or reliance thereon, whether in contract or in tort (including negligence), shall be limited to direct losses and under any circumstance be limited to 300,000 USD.

**Application:**

- See Annex to the Certificate (3 pages).

**Remarks:**

- Material and test requirements are based on the actual valid DNV Rules and international standards accepted by DNV.
- Reference is made to the actual Accreditation Certificate acc. to EN ISO 17025:2018, No.: D-PL-11166-01-01.
- A condition for retention of the AOSS certificate in its validity period is that periodical assessments are successfully carried out (at least every 18 month alternating between applicable agents). The objective of the periodical assessment is to verify that the conditions have not been altered. It is further to be noted that the Society shall be informed of any: Modifications to the testing facilities which are liable to affect its characteristics and functions, as originally specified and tested.

**Agents:**

| Name                                      | City                | Country |
|-------------------------------------------|---------------------|---------|
| Element Materials Technology Hamburg GmbH | Esslingen           | Germany |
| Element Materials Technology Hamburg GmbH | Hamburg             | Germany |
| Element Materials Technology Hamburg GmbH | Mülheim an der Ruhr | Germany |

## **Annex to the AOSS Certificate no. AOSS0000M6C**

The test methodes are indicated with the following symbols for the locations in which they are conducted:

MH = Mülheim, ES = Esslingen-Mettingen, HH = Hamburg

## 1 Corrosion testing

|                                         |                                                                                                                                                                                                                                     |            |
